GLOBAL MARKETS

Global Market Update

US stocks advanced on Monday, building on their largest weekly percentage gain of the year as investors focused on the Democratic National Convention and the upcoming Jackson Hole Economic Symposium. The Dow Jones Industrial Average rose 236.77 points, or 0.58%, to 40,896.53. The S&P 500 gained 54 points, or 0.97%, at 5,608.25 and the Nasdaq Composite added 245.05 points, or 1.39%, at 17,876.77.

Crude Oil

Oil prices edged lower on Tuesday as Israel accepted a proposal to tackle disagreements blocking a ceasefire deal in Gaza, helping ease worries about a supply disruption in the Middle East.

Gift Nifty

The GIFT Nifty is trading higher, indicating a positive start for the day. Nifty futures were trading at 24,665 at 06:50 am IST.

Nifty Outlook:

The domestic benchmark indices opened on a positive note, in line with global cues. The Nifty started the day with a gap up and traded within a narrow range throughout, eventually closing on a positive note at 24,573. However, the broader market outperformed the benchmarks, with the Nifty Midcap 100 and Smallcap 100 indices rising by around 1.92% and 1.53%, respectively. Technically, the Nifty has formed a small red candle on the daily chart, signaling some hesitation at higher levels. On the downside, the 21-Day Exponential Moving Average (DEMA), positioned near 24,385, will serve as strong support in the short term. As long as the index stays above 24,380, the bullish momentum is expected to persist. On the upside, gap hurdles are present at 24,690 and 24,960 levels.

Bank Nifty Outlook:

The Bank Nifty also opened with a gap up but failed to sustain higher levels, leading to profit booking. Consequently, the index ended the day on a negative note at 50,368. Technically, the Bank Nifty has formed a red candle on the daily chart, indicating weakness. The index was unable to cross the barrier of the 21-DEMA, which is located near 50,770, and the previous week's high is near 50,830 levels. A sustained move above 50,830 could propel the index towards the 51,200-51,500 range. Until then, the index is likely to consolidate within the band of 49,650-50,830.
