GLOBAL MARKETS

Global Market Update

The S&P 500 and Nasdaq Composite ended a fickle session weaker on Thursday, failing to regain ground lost in the previous day's tech-triggered sell-off as investors grappled with the likely direction of megacaps. The Dow Jones Industrial Average hung onto early gains to close higher on stronger-than-expected U.S. gross domestic product data. The S&P 500 lost 27.91 points, or 0.51%, at 5,399.22 points, while the Nasdaq Composite fell 160.69 points, or 0.93%, to 17,181.72. The Dow Jones Industrial Average rose 81.20 points, or 0.20%, to 39,935.07.

Crude Oil

Oil prices were up slightly on Friday on stronger-than-expected U.S. economic data that raised investor expectations for increasing crude oil demand from the world's largest energy consumer.

Gift Nifty

The GIFT Nifty is trading higher, indicating a positive start for the day. Nifty futures were trading at 24,482 at 07:00 am IST.

TECHNICAL VIEW

Nifty Outlook:

Domestic equity markets opened negatively on Thursday due to weak global cues. Subsequently, the Nifty opened with a gap down and registered a low of 24,210. However, the index witnessed strong buying interest, which helped the Nifty to settle F&O expiry day on a flat note at 24,406. The India VIX jumped by 7.3% and settled near 12.46 levels. Technically, the index on a daily scale has formed a bullish candle near the 21-DEMA support and managed to defend the 24,200 level. Thus, 24,200 and 24,000 will serve as short-term support for the Nifty. On the upside, the index is facing resistance near the 24,620, followed by 24,860.

Bank Nifty Outlook:

The Bank Nifty index opened on a negative note and remained under pressure throughout the day. As a result, Bank Nifty settled the day on a negative note at 50,889 levels. Technically, the index on a daily scale has formed a tiny green candle but failed to close above the 51,100 level, indicating weakness. As long as the index holds below 51,100, weakness is likely to continue. On the downside, 50,500 and 50,000 will act as support levels.
